- ✓ Use Case creation and validation

IAM Solution Certification

- ✓ Validation and certification of all target applications and repository with various leading IAM solutions.

Manage the User LifeCycle

No other initiative in information security can deliver the ROI that Identity & Access Management can. Effectively managing the user lifecycle reduces risk as well as generating measurable efficiencies across multiple lines of business.

Success with IAM

Multi-disciplinary expertise is required when implementing IAM strategies to ensure that the requirements of all aspects of the business are identified. Successful strategies need a broad understanding of the options, solutions, and best practices across various vendors and solution sets.

Rapid Fires™

Rapid Fires™ are designed to quickly define and validate technical strategies. Delivered by senior Tevora consultants, Rapid Fires™ provide detailed implementation plans, use cases, solution certification, technical validation and procurement planning.

Rapid Fire™ Strategic IAM

With Rapid Fire™ Strategic IAM, Tevora's senior consultants help define your user lifecycle strategy from start to finish. All solution aspects of implementation are documented to include:

- Role Mining and Access Certification
- User Provisioning
- Access Control
- Single Sign On
- Federation Strategy
