ISO 27001

Compliance requirements and security controls are not just tools to meet a singular requirement, but are one of the most valuable tools to protect an organization's most valuable assets: intellectual property and consumer information.

WHAT IS ISO?

The International Organization for Standardization (ISO) develops global standards for everything from electronics to management systems.

In the area of information security management, ISO promotes development of holistic programs that provide best practice criteria for adoption and execution by teams responsible for initiating, implementing or maintaining information security.

ISO 27001 CERTIFICATION

ISO 27001 is a standard that defines an organization's Information Security Management System (ISMS). The ISMS consists of documented security objectives and measures that effectively manage accessibility, confidentiality and integrity of information assets and minimizes information security risks.

The ISO 27001 standard sets the foundation for adopting additional standards like STAR and ISO 27018 for privacy-related and cloud security controls.

ROAD TO ISO CERTIFICATION

Tevora's proven program is designed with efficiency in mind and has been perfected from years of working as security advisors to some of the largest companies in the world. Tactical and precise, the road to certification with Tevora is a simple three-step process:

1 GAP ANALYSIS

A gap analysis paves the way for identifying the tactical and strategic controls that are required to achieve ISO 27001 Certification. A Tevora ISO 27001 Lead Auditor will guide you through identifying the ISMS scope, control criteria, and provide gap remediation recommendations in order to achieve certification aligned with your organization's strategic objectives.

2 PREPARATION

Tevora's ISO 27001 Lead Auditors understand security and how to apply security controls in an agile manner to meet your goals and objectives. Whether it is providing strategic direction, conducting risk assessments and internal audits, writing security policies, or implementing security controls, our consultants will ensure your organization has everything in place to successfully achieve certification.

3 CERTIFICATION

True partners are with you until the end and Tevora will be there to walk you through the certification process. From coordination to mock walkthroughs and onsite support, we will assist in all the nuances of the audit cycle.
