# Hitrust Certification

Compliance requirements and security controls are not just tools to meet a singular requirement, but are one of the most valuable tools to protect an organization's most valuable assets: intellectual property and consumer information. ▲

## What is HITRUST CSF?

The HITRUST Common Security Framework (CSF) was developed to address the multitude of security, privacy and regulatory challenges facing healthcare organizations today. With a comprehensive, yet flexible framework of prescriptive and scalable security solutions, it incorporates a risk-based approach to federal and state regulations, as well as common standards and frameworks to help organizations address these challenges.

## What does CSF assurance mean to you?

HITRUST CSF certification allows healthcare organizations to achieve and reflect their compliance with HIPAA and Omnibus requirements.

HITRUST CSF assurance provides a practical means of doing this through the adoption of a common set of security objectives and assessment processes. It also streamlines how healthcare organizations manage business-associate compliance by allowing business associates to assess once and report to their many constituents.

## Road to HITRUST CSF Certification

Certification can only be achieved under the CSF Assurance program by completing a successful third party validation of all the CSF controls by a certified CSF Assessor. As a certified CSF Assessor, Tevora's proven program is designed with efficiency in mind. Tactical and precise, the road to HITRUST certification with Tevora is a simple four-step process:

### 1. Gap Analysis

A gap analysis will outline strategies for a cost effective road to certification. In addition to scope reduction, corrective action plans will be created so remediation efforts can be direct and focused.

### 2. Preparation

Working with Tevora ensures your organization will achieve HITRUST certification efficiently; whether it's writing security policies or implementing security controls.

### 3. Self-Assessment Assistance

Using the MyCSF portal, Tevora will assist you with defining the right scope for your organization. Tevora will partner with you to help stakeholders understand each requirement, the evidence needed and how to measure each control.

### 4. Certification

Tevora will validate the controls in place based on the scope and applicable controls defined during the self-assessment. Tevora will validate your organization successfully demonstrates compliance for each control and achieves a rating of 3 or higher on HITRUST's scale (1 to 5) for each key control domain.

## Company Overview

Tevora is a specialized management consultancy focused on cyber security, risk, and compliance services. Our combination of collaborative strategic planning and skillful execution make us a trusted partner to some of the most famous brands in the world ▲

### Go forward. We've got your back.

We live in a digital world, and your customers trust you to keep their information safe. We make it our responsibility to equip you with the information, tools, and guidance you need to stay out of the headlines [and get back to business].

### Eyes on the future.

Tevora takes a long-term outlook and proactive approach to every engagement. We combine our technical knowledge with practical business acumen to produce and execute strategies that fortify your organization's assets and build a foundation for the future.

### Audit Standards

Our MBAs and CISSPs can help your organization assess and test against PCI DSS, PADSS, HITRUST, ISO 27001, STAR, SOC I, SOC II, MPAA and more.

### Compliance

We assess, audit, and certify compliance across a comprehensive portfolio of cybersecurity standards.

### Enterprise Risk Management

We speak the language of cyber risk and translate it into business impact - giving you rich data to make meaningful decisions.

### Data Privacy

We help you craft strategies and plans that work; allowing you to meet the growing demands of domestic and international privacy regulations.

### Security Solutions

We help you plan, implement, and integrate cybersecurity products that reduce your risk profile: on-prem, mobile, and in the cloud

### Threat Management

We test your systems, processes, and security with a world class team of certified hackers and security researchers.

### Incident Response

We are a team of first responders, threat hunters, and incident containment specialists working with the latest tools and techniques; ready to serve when your business needs it most.
