Compliance requirements and security controls are not just tools to meet a singular requirement, but are one of the most valuable tools to protect an organization’s most valuable assets: intellectual property and consumer information.

What is PCI-DSS?

The Payment Card Industry Data Security Standard was designed in collaboration with the major payment brands—Visa, MasterCard, American Express, Discover and JCB—to provide a comprehensive information security framework with a focus on improving payment account security throughout the transaction process.

How does PCI DSS compliance apply to you?

The PCI DSS version 3.1 standard applies to all organizations which hold, process or exchange cardholder information.

Compliance validation must be provided by merchants and service providers as a means of ensuring to the card brands and your acquiring bank that you have adhered to the PCI Data Security Standard.

Validating PCI DSS compliance may vary based on the levels defined by the card brands and can range from self assessments by your organization to a yearly submission of a signed Report on Compliance (ROC) by a QSA in good standing as acknowledged by the PCI Security Standards Organization.

Assessing your PCI DSS Compliance

Tevora has been a certified PCI Qualified Security Assessor (QSA) since the standard was created in 2004. With over a decade serving as a trusted security assessor for some of the top companies in North America, Tevora’s proven methodology will guide your compliance efforts with efficiency in a simple three-step process:

1. Gap Analysis

Tevora will work with your team in outlining strategies for a cost effective road to compliance. In addition to scope reduction, our QSAs will assess and validate security controls earlier in the process so remediation efforts can be directed and focused.

2. Remediation

Whether it is writing security policies or implementing the security controls, working with our QSAs ensures direct and efficient ROI and a demonstrated prioritized approach to compliance.

3. Certification

As your trusted advisor, Tevora will ensure your Report on Compliance (ROC) is executed in confidence and on time.
Tevora is a specialized management consultancy focused on cyber security, risk, and compliance services. Our combination of collaborative strategic planning and skillful execution make us a trusted partner to some of the most famous brands in the world.

Go forward. We've got your back.
We live in a digital world, and your customers trust you to keep their information safe. We make it our responsibility to equip you with the information, tools, and guidance you need to stay out of the headlines [and get back to business].

Eyes on the future.
Tevora takes a long-term outlook and proactive approach to every engagement. We combine our technical knowledge with practical business acumen to produce and execute strategies that fortify your organization's assets and build a foundation for the future.

Audit Standards
Our MBAs and CISSPs can help your organization assess and test against PCI DSS, PADSS, HITRUST, ISO 27001, STAR, SOC I, SOC II, MPAA and more.

Compliance
We assess, audit, and certify compliance across a comprehensive portfolio of cybersecurity standards.

Enterprise Risk Management
We speak the language of cyber risk and translate it into business impact - giving you rich data to make meaningful decisions.

Data Privacy
We help you craft strategies and plans that work; allowing you to meet the growing demands of domestic and international privacy regulations.

Security Solutions
We help you plan, implement, and integrate cybersecurity products that reduce your risk profile: on-prem, mobile, and in the cloud.

Threat Management
We test your systems, processes, and security with a world class team of certified hackers and security researchers.

Incident Response
We are a team of first responders, threat hunters, and incident containment specialists working with the latest tools and techniques; ready to serve when your business needs it most.
