Virtual Security Operations Center (vSOC) Managed Service

In our digital world, technology isn't the only thing that constantly evolves. Threats do too. As new and maturing technologies such as IoT, artificial intelligence, mobile, and cloud redefine our perimeters, their endpoints also become potential points of entry for attackers. Modern companies with their eye on the business may not have their "eyes on glass," monitoring endpoints for signs of malicious activity and tracking it down before it can impact the business. But this security vigilance is as important as the business opportunities afforded by digital transformation. Which is why a managed service, such as the Tevora virtual security operations center (vSOC) is an ideal solution for organizations that are finding their digital footing — and need it to be secure. ▲

Endpoint Detection and Response

The security of data is essential, if not a requirement, of doing business. The shift from the data center to the cloud introduces more, often unique security risks making endpoint detection response (EDR) critical to an effective digital security strategy. The Tevora vSOC managed service solution leverages the highly honed skills of our top incident response experts and industry-leading Carbon Black Response EDR for the rapid and effective detection, response, and remediation of threats across the endpoints in your digital environment.

Virtual Protection

Being "virtual" means that Tevora first responders can apply coverage anywhere around the world. Tevora vSOC offers all the benefits of a managed service, including rapid activation, fixed costs, scalable capabilities, and a light footprint. Our onboarding process tailors our security operations services to your needs by identifying your key stakeholders, establishing escalation points, and key performance indicators (KPIs) that help you evaluate the impact of our EDR services.

How Tevora Manages Your Endpoints

Virtual Protection

As a remote, light footprint managed service, Tevora vSOC gives companies regardless of size or location access to top SOC and incident response experts, as well as to industry-leading EDR tools such as Carbon Black Response.

Services Include:

- 24/7 Monitoring
- Detection of Unknown (Signature-less Attacks)
- Human Analysis by Professional Incident Responders
- Full Incident Response Support
- Endpoint Isolation
- Threat Containment and Eradication
- Automation via Integrated APIs
- Quarterly Briefings and Security Recommendations

Security for a Digital World

Digital transformation is about more than moving an application from the data center to the cloud. While the opportunities are significant, the risks are too. The Tevora vSOC managed service enables companies of any size to ensure that security is part of their transformation strategy. And with our 24/7 continuous coverage, you get peace of mind knowing that your digital footprint is being monitored constantly by our experts using the Carbon Black solution to detect attacks quickly, and respond effectively.

Go forward. We've got your back.

We live in a digital world, and your customers trust you to keep their information safe. We make it our responsibility to equip you with the information, tools, and guidance you need to stay out of the headlines [and get back to business].

Eyes on the future.

Tevora takes a long-term outlook and proactive approach to every engagement. We combine our technical knowledge with practical business acumen to produce and execute strategies that fortify your organization's assets and build a foundation for the future.

Audit Standards

Our MBAs and CISSPs can help your organization assess and test against PCI DSS, PADSS, HITRUST, ISO 27001, STAR, SOC I, SOC II, MPAA and more.

Tevora offers a full range of services designed to anticipate and meet the changing needs of your enterprise

Compliance
We assess, audit, and certify compliance across a comprehensive portfolio of cybersecurity standards.

Enterprise Risk Management
We speak the language of cyber risk and translate it into business impact - giving you rich data to make meaningful decisions.

Data Privacy
We help you craft strategies and plans that work; allowing you to meet the growing demands of domestic and international privacy regulations.

Security Solutions
We help you plan, implement, and integrate cybersecurity products that reduce your risk profile: on-prem, mobile, and in the cloud.

Threat Management
We test your systems, processes, and security with a world class team of certified hackers and security researchers.

Incident Response
We are a team of first responders, threat hunters, and incident containment specialists working with the latest tools and techniques; ready to serve when your business needs it most.
