TEVORA™

HITRUST Certification Services

If your organization handles healthcare information, you probably know that safeguarding this sensitive data is critical to your success. Achieving HITRUST Certification is a great way to ensure that your sensitive information is secure while letting your customers know that you take data security and privacy seriously.

What is the HITRUST CSF?

The HITRUST Common Security Framework (CSF) addresses the multitude of security, privacy, and regulatory challenges facing healthcare organizations today. With a comprehensive framework of security requirements, HITRUST incorporates a risk-based approach to federal and state regulations and common standards and frameworks to help organizations address these challenges.

Which Assessment Option is Best for You?

In October 2021, HITRUST announced two new assessment options to accommodate organizations with different levels of risk exposure. With these additions, HITRUST now offers three assessment alternatives:

- **The Basic, Current-State (bC) Assessment (New).** Suitable for lower-risk scenarios.
- **The Implemented, 1-Year (i1) Validated Assessment (New).** Suitable for moderate-risk scenarios or where a baseline risk assessment is needed.
- **Risk-Based, 2-Year(r2) Validated Assessment (Current).** Suitable for higher-risk scenarios.

Your Trusted Partner

Tevora can be a trusted partner to help you achieve HITRUST certification. Whether you need help preparing your organization for certification or an experienced assessor to perform your HITRUST assessment, we've got you covered.

Road to
HITRUST Certification

To achieve HITRUST certification, organizations must complete a successful third-party validation of all CSF controls by a certified External Assessor. As an experienced HITRUST Authorized External Assessor, Tevora has developed a proven assessment program designed with efficiency in mind. Tactical and precise, the road to HITRUST certification with Tevora is a simple three-step process:

1 Gap Analysis

- We perform a tactical gap analysis to identify strategies for a cost-effective road to HITRUST compliance.
- We work with you to create a direct and focused remediation plan for achieving HITRUST compliance.

2 Remediation

- We help you prepare for your certification in an organized, efficient manner.
- We jump in to help you with anything from writing security policies to implementing controls.

3 Validated Assessment

- We help you pick the right HITRUST assessment approach for your organization.
- As a HITRUST Authorized External Assessor, we are fully qualified to perform the recently-announced i1 and r2 Validated Assessments.

Go forward. We've got your back.

We live in a digital world, and your customers trust you to keep their information safe. We make it our responsibility to equip you with the information, tools, and guidance you need to stay out of the headlines [and get back to business].

Eyes on the future.

Tevora takes a long-term outlook and proactive approach to every engagement. We combine our technical knowledge with practical business acumen to produce and execute strategies that fortify your organization's assets and build a foundation for the future.

Audit Standards

Our MBAs and CISSPs can help your organization assess and test against PCI DSS, PA-DSS, SSF, HITRUST, ISO 27001, STAR, SOC I, SOC II, MPAA and more.
