

Insured Security Assessment

Cyber insurance providers need a partner with deep cybersecurity experience to help ensure their clients are prepared to respond quickly and effectively when cyber incidents occur.

Tevora's streamlined assessment for your insured clients focuses on examining their environment for security risks. The security health check covers security misconfigurations, internal and external vulnerability scans, open-source intelligence (OSINT) threats, and Dark Web scans for exposed credentials, sensitive data, exposed credentials and sensitive data. Tevora collaborates with cyber insurance carriers and insured clients to reduce the financial and reputational damage caused by cyberattacks. We assist companies in acquiring cyber insurance policies and help assess the effectiveness of risk mitigation measures for existing policies.

Minimize Their Cyber Risk & Reduce Your Financial Risk

By utilizing this approach, insurance providers can swiftly identify high-risk clients and effectively reduce the overall threat landscape. This can result in increased profits and decreased financial risks for insurance providers.

Your Trusted Partners

An alliance with **Tevora** enables experts from both teams to collaborate closely with insured clients, ensuring their preparedness against any potential threats from attackers.

Readiness and Renewal Assessment Methodology

Step 1: Sensor Deployment

Distribution of lightweight endpoint sensors across the organization for a 30-day period for continuous security monitoring.

Step 2: Internal Security Survey

In-depth gathering and analysis of data from system configurations, network traffic, and user behavior to pinpoint potential risks such as malware, suspicious activity, or misconfigurations.

Step 3: External Vulnerability Scanning

Employ OSINT tools to detect publicly accessible devices, services, and vulnerabilities linked to the organization's external infrastructure.

Step 4: Dark Web Intelligence

Perform Dark Web searches to find compromised credentials or sensitive information related to the organization and offer guidance for enhancing password policies.

Step 5: Comprehensive Security Report and Recommendations

Compile findings from internal and external analyses, open-source intelligence, and Dark Web research into a detailed report with actionable recommendations.

Go forward. We've got your back.

We live in a digital world, and your customers trust you to keep their information safe. We make it our responsibility to equip you with the information, tools, and guidance you need to stay out of the headlines [and get back to business].

Eyes on the future.

Tevora takes a long-term outlook and proactive approach to every engagement. We combine our technical knowledge with practical business acumen to produce and execute strategies that fortify your organization's assets and build a foundation for the future.

Audit Standards

Our MBAs and CISSPs can help your organization assess and test against PCI DSS, PA-DSS, SSF, HITRUST, ISO 27001, STAR, SOC I, SOC II, MPAA and more.

TEVORA

Tevora is a specialized management consultancy focused on cyber security, risk, and compliance services. Our combination of collaborative strategic planning and skillful execution make us a trusted partner to some of the most famous brands in the world.

Go forward. We've got your back.

Tevora offers a full range of services designed to anticipate and meet the changing needs of your enterprise.

Compliance

We assess, audit, and certify compliance across a comprehensive portfolio of cybersecurity standards.

Privacy & Risk

We help you craft strategies to meet the changing demands of privacy regulations and translate cyber risk into rich data to make meaningful business decisions.

Cyber Solutions

We help you plan, implement and integrate cybersecurity products that reduce your risk profile on-prem, mobile and in the cloud.

Penetration Testing

We test your systems, processes, and security with a world class team of certified hackers and security researchers.

Incident Response

We are a team of first responders, threat hunters, and incident containment specialists working with the latest tools and techniques; ready to serve when your business needs it most.

Cloud Security

We ensure you have provable cloud compliance as an output of your migration to the cloud.
