

InfoSec Support

In today's evolving economy and threat landscape, assistance from information security specialists can both propel your company forward and help carry the workload along the way. Tevora is that information security specialist.

Tevora can provide trusted security consultants with flexible infosec support hours, expansive security expertise across all business areas, and industry leading solutions and practices to help you meet your company's goals.

The Tevora Difference

InfoSec Support and Staff Augmentation Services is a flexible approach to strengthen your company's security and IT teams in order to meet both business and security demands. With the capability for both onsite and remote working environments, flexible hours per week, Tevora with our team can adapt to fill those gaps.

Partnership with Tevora includes the entire breadth and experience of our team behind each project. This could include a **Tevora Project Manager** who can manage the project budget, build out and monitor ongoing project plans, and coordinate resources. In addition, during each given project, **Security Practice Leads** will provide advice and guidance to technical support staff. These unique features set Tevora apart within the InfoSec Support industry, enhancing InfoSec operations and protection of client and organizations data.

Compliance Support

Tevora understands industry and government security regulations and can help you prepare and successfully complete an assessment.

- Prepare subject matter experts for the external walk throughs with auditors
- Coordinate assessment interviews with subject matter experts and auditors
- Facilitate assessment interview follow ups and evidence collection
- Alleviate employees from compliance tasks that divert attention from daily duties

Virtual CISO

Bridging the gap between existing management and technical teams to strengthen your organizations security program.

- Provide threat analysis and strategy guidance
- Anticipate future security and compliance challenges
- Align security and business objectives
- Create metrics to measure the health of the security program

GRC Support

Tevora's consultants' extensive knowledge will bridge the gaps in expertise or availability of internal resources.

- Support the GRC program during interim GRC resource gaps
- Coordinate the completion of controls and monitor compliance with security obligations
- Develop information security policies, standards, and procedures
- Provide recommendations on GRC program development

IT and Cybersecurity Internal Audit

Trained auditors provide an independent review of client IT and cybersecurity controls to measure control maturity, operating effectiveness, and gaps.

- Scope internal audit based on a risk assessment
- Analyze controls to identify control gaps and process improvement opportunities
- Report on the compliance status
- Collaborate with stakeholders to identify remediation activities and timelines

Unified Control Framework

Providing a methodology to develop a unified control framework that supports compliance programs and organization's ability to adapt to changing requirements and scope.

- Develop and document unified controls that align with current security practices
- Identify control gaps and develop actions to remediate
- Create a framework that can be uploaded to GRC tools and updated with changing compliance and business requirements
- Develop and document testing procedures and control artifacts that can be leveraged during external assessments

Go forward. We've got your back.

We live in a digital world, and your customers trust you to keep their information safe. We make it our responsibility to equip you with the information, tools, and guidance you need to stay out of the headlines [and get back to business].

Eyes on the future.

Tevora takes a long-term outlook and proactive approach to every engagement. We combine our technical knowledge with practical business acumen to produce and execute strategies that fortify your organization's assets and build a foundation for the future.

Audit Standards

Our MBAs and CISSPs can help your organization assess and test against PCI DSS, PA-DSS, SSF, HITRUST, ISO 27001, STAR, SOC I, SOC II, MPAA and more.

ACHIEVED ACCREDITATIONS:

AUTHORIZED ASSESSOR:

TEVORA™
